

CENTREFIRE CARTRIDGES

Introducing CBC

The perfectionist manufacturer of top quality centrefire ammunition that ensures accuracy and dependability round after round.

Produced from materials of the highest quality. All cases are reloadable time after time.

Non corrosive boxer primers matched with special smokeless propellant are used throughout the range. Coupled with strict quality control it all adds up. You can ALWAYS be sure of CBC.

Confidence Breeds Confidence.

*Velocity and energy at 15 ft from muzzle of test barrel.

The above results were obtained under the following atmospheric conditions:
Temp.: 15 Degrees Centigrade (59 Degrees Fahrenheit)
Press.: 75 cm - Hg (29.53" Hg)
Alt.: 0 m (0 ft)

Companhia Brasileira de Cartuchos began its operations in 1926 with 20 employees, producing shotgun cartridges in a simple shed.

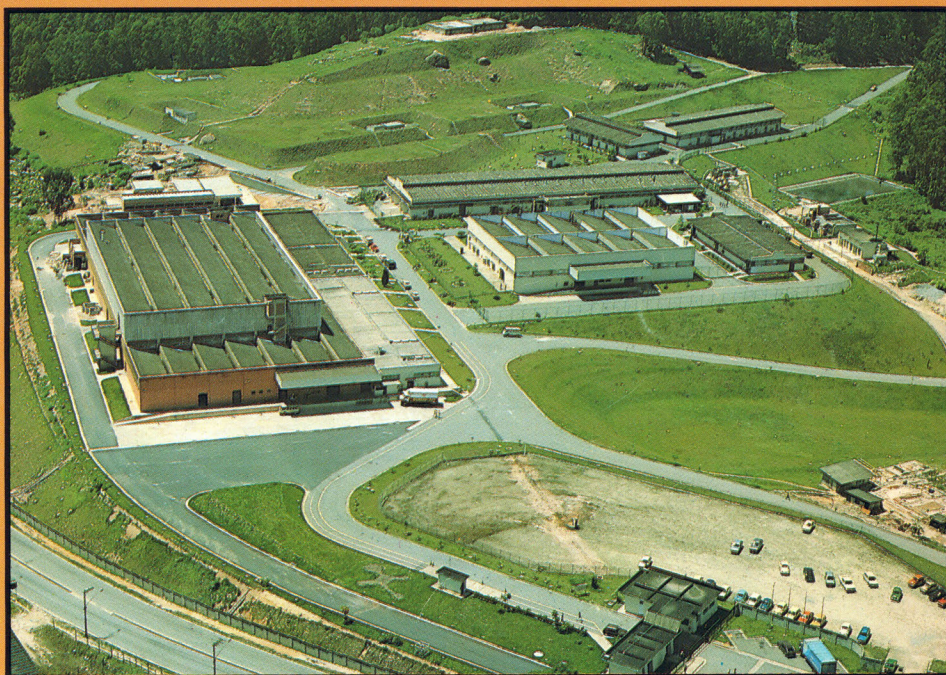

Today, Companhia Brasileira de Cartuchos has two big production sites. The first, located in Santo André, has an area of 57,000 square meters, of which 25,000 square meters are covered by buildings. The second site, located in the Municipality of Ribeirão Pires has 30,000 square meters of constructions in a green area of 1,800,000 square meters.

In those two sites, 2000 highly specialized employees are responsible for the production of an extensive variety of items. CBC's main products are: ammunition for military use;

centrefire, rimfire, and shotgun cartridges for non-military use; shotguns and rifles; miscellaneous items for the cosmetic and automobile industries; components for ball-point pens, etc.

A considerable part of this production is exported to more than 60 countries. This confirms the high quality of CBC's products.

True to the principle of always producing the best, Companhia Brasileira de Cartuchos has always invested soundly in research and the development of its manufacturing processes, thus ensuring the high quality level of its products, and its prominent position amongst the foremost manufacturers of firearms and ammunition in the world.
